RE: TARIFF CHANGE FOR LEAK ADJUSTMENTS

Dear Customer,

The Martin County Water District will be submitting the following change to our Tariff regarding Customer Leak Adjustments with the intent to begin on January 1<sup>st</sup>, 2022. If you have any questions, please don't hesitate to contact our office. Additionally, if you would like to make any public comments opposing the change you may contact the Public Service Commission.

Thank you,

*Craig Miller*

### RULES AND REGULATIONS

---

billed at the utility's regular rates, while the remaining usage will be charged at the per thousand gallon leak adjustment rate, as set forth in the rates and charges portion of the utility's approved tariff. All water passing through the meter must be accounted and paid for by the customer. So the customer will owe the amount of his/her average bill plus the per thousand gallon leak adjustment rate for the remainder of the water that passed through the meter.

3. If meter readings are not available for the entire twelve-month period, the water bill will be estimated by the utility, subject to an upward or downward adjustment once a twelve-month average of actual meter readings can be calculated.
4. ~~Only two (2) leak adjustments will be permitted during the lifetime of a customer's water service line. Each of those adjustments may cover a maximum of two (2) billing periods. Before a third adjustment can be considered, the entire water service line from the meter box to the house or other service structure must be replaced. The customer shall notify the utility so that an inspection of the replacement service line can be made. If plastic pipe is used for any repair of underground water service lines, it must be no less than class 160 PSI, either CTS or IPS pipe. The use of radiator clamps, king nipples, or the equivalent cannot be accepted.~~
4. A customer will be permitted one leak adjustment per year. Each adjustment may cover a maximum of two (2) billing periods. The customer shall bring proof of repair to the utility's billing office in the form of receipts and pictures when applying for the adjustment. If plastic pipe is used for any repair of underground water service lines, it must be no less than class 160 PSI, either CTS or IPS pipe. The use of radiator clamps, king nipples, or the equivalent cannot be accepted.

X. Ownership of Mains, Services, and Appurtenances:

1. All mains, fire hydrants, valves, crossings, and other appurtenances are and shall remain the property of the utility, whether installed by the utility or the customer.
2. All service lines from the main to the meter with appurtenances are and shall remain the property of the utility, whether installed by the utility or the customer.

3. The customer shall install, own, and maintain his/her service line from the meter  
(or point of delivery) to the point of usage.

Y. Notification of System Problems. The customer shall notify the utility immediately should the service be unsatisfactory for any reason, or should there be any defects, problems, trouble, or accidents affecting the water system.
